

TruVista Hosted Voice

It's more than a phone system.
It's a better way to communicate.

Saves You Money

Unlike other systems, TruVista Hosted Voice gives you more value for your purchase. With all features included, multiple deployment options, less add-on fees, and a simplified pricing model, TruVista Hosted Voice is the best value in Unified Communications (UC).

Powerful Unified Communications Features

TruVista Hosted Voice is equipped with UC features that will change the way your organization communicates, both internally and externally. Easy-to-use features, such as presence, instant messaging, mobility, conferencing, and voicemail/fax to email, will boost employee productivity and allow them to work from almost any location.

Easy to Manage

An intuitive, web-based, point-and-click interface allows you to manage every aspect of TruVista Hosted Voice whether you are working in the office, from home, or even at a coffee shop.

TruVista Hosted Voice is the Best Communications System for Your Business

TruVista Hosted Voice is more than a phone system—it's a better way to communicate. The combination of TruVista Hosted Voice and D-Series phones provides a complete Unified Communications solution for small and mid-sized businesses by integrating all of your office communications, including phone, fax, chat, and web conferencing, to give you a customized communications experience. It allows you to access call queues, presence, and the applications you need right at your fingertips! With the TruVista Hosted Voice Softphone App for iPhone[®] and Android[™] and the Desktop Softphone Clients for Mac and Windows, employees can be productive from anywhere. No longer are users tied to their desk whenever they need to make a phone call! TruVista Hosted Voice also has tools that can connect your existing software and applications, such as Salesforce CRM and Outlook, to better arm your users with the contact information they need, when they need it. Talk about flexibility!

TruVista Hosted Voice Softphone for iPhone and Android helps maintain your brand by allowing users to make outgoing calls to your clients with your company caller ID.

TruVista Hosted Voice and D-Series IP Phones

Advanced Phone Applications	✓	✓	✓	✓

* Each conference call participant is considered one concurrent call. If your organization wishes to use the call recording function for a large percentage of concurrent calls (~40%), you should purchase the next highest level appliance based upon concurrent call limits (ex. move from the D65 to the D80) for best performance.
