Press Release

TruVista Fiber Brings Broadband Internet, HD Phone, Video And New Business Services To More Areas of Rabun County

Clayton, Georgia, March 10, 2014: TruVista's fiber optic expansion has reached a new milestone, bringing broadband Internet access, upgraded video, HD phone and new business services to the Clayton, Wylie-Lake Rabun and Dillard areas in Rabun County. Internet access speeds of up to 35 Mbps are now available for residential customers with business speeds of up to 1 Gbps. Scores of channels have been added to the channel lineups of the areas including many HD channels. New enhanced HD phone services are now available. Business services introduced include fiber ring based Metro Ethernet services and new network hosted business phones that provide the same voice features available to Fortune 500 businesses without the need for an onsite phone system.

Tony Allred, President of The Rabun County Chamber of Commerce said: "Since we installed TruVista as our Telephone and Internet provider, our internet speeds are amazing and always as fast as advertised. But best of all is the phone system. We were able to take out a closetful of wires and boxes; now we just plug the phones into our internet outlets and start dialing. The best of all, we're saving big bucks each month. Congratulations to the TruVista team for helping to bring Rabun into the 21st Century."

According to Trey Sharpton of Goin' Postal Clayton: "TruVista has been great! They have saved me money every month over my previous service. They have been very reliable and fast. Their customer service people are very helpful and courteous."
